

CONVEYORS

As a leader in Load Transfer / Load Adjustment Services, Hulcher Services maintains a fleet of specialized equipment including conveyors.

Some conveyors are self-propelled, making them particularly useful in rail yards or other situations where external power may not be available.

Our conveyors are capable of delivering a variety of Load Transfer / Load Adjustment Services services for grain businesses, including:

- Derailment support
- Load reductions / load adjustments
- Load transfer services
- Post-spill clean-up services
- Transload services

Our conveyors are maintained through Hulcher's multi-layered, proactive system of inspections and servicing that ensures our equipment is trustworthy and ready to go to work when you need it.

Conveyors are deployed independently or in pairs, or in conjunction with other Hulcher equipment like the dump truck, telehandler, wheel loader and forklift.

Hulcher combines 30 years of Load Transfer / Load Adjustment Services expertise with one of the most extensive networks of people and equipment in North America. We are close by, with the right equipment and the most professional crew members in the industry, to respond to your load transfer and load adjustment needs.

When your Load Transfer / Load Adjustment Services project calls for equipment that is properly equipped, expertly operated and available when you need it, call Hulcher at 800-637-5471.
