

# MAINTENANCE SERVICES

**Hulcher Services performs an endless list of support projects for railroads and industry. Here are just a few of the maintenance services we have recently completed:**

**Asphalt work** - Repave parking lots, patch pot holes, resurface ramps, build roads and walkways and construct railroad crossings.

**Construction, maintenance, manual labor** - Paint structures, set up a modular buildings, replace siding, build fences, stencil rail cars, pick up trash, put down straw for erosion control, remove dead animals from tracks, water areas for dust control and sweep streets.

**Demolition** - Demolish buildings, silos, tanks, towers, asphalt, poles and other structures.

**Hauling** - Transport vehicles, furniture, water bottles, portable generators, concrete, traction motors and wheels and heavy equipment.

**Vegetation control** - Tree canopy control over right-of-way, and weed eating, mowing and vegetation control at rail yard and along tracks.

**Snow removal** - Clean snow from roads and parking lots, spread salt, respond to avalanches on the right of way.

Unlike most contractors, our crews are background-checked, trained and certified to work for all Class 1s. This means Hulcher is uniquely qualified and ready to support your maintenance services needs.
