

POST-SPILL CLEAN-UP

A spill can happen for many reasons. It might have been the result of worker error. It could happen as a result of a derailment. Sometimes weather creates a spill, as when flood waters result in expanding grain that causes grain silos to collapse.

Hulcher Services can mobilize the people and equipment to do a full-service recovery operation, sort or segregate the material, recondition the product, do site restoration, remediation and clean up.

Hulcher has seasoned professionals on staff that can evaluate the commodity and recommend a course of action to salvage any usable items. When necessary we can dispose of unsalvageable product or coordinate disposal through a licensed waste hauler*.

Hulcher maintains a variety of specialized equipment for performing post spill clean-up projects, including:

- Caterpillar® Excavator
- Caterpillar® Sideboom
- Caterpillar® Track Loader / Wheel Loader
- Hi-Rail Grapple Truck
- Hi-Rail Vacuum Truck
- Dump Truck or Hi-Rail Rotary Dump Truck
- Caterpillar® Dozer
- Conveyor
- Telehandler, Skid Steer and Forklift

Call Hulcher today at 800-637-5471 to learn more about our post-spill clean-up services.

* Analysis, containment, treatment, transport, and disposal of material are each conducted in full compliance with relevant federal and applicable state laws/regulations (licensing, permitting, procedural and operational protocol) which sometimes requires the participation of fellow contractors engaged by the customer and/or Hulcher subcontractors.
