

POWER WASHER

Hulcher's power washer delivers the cleaning strength of pressurized water with the mobility of a pick-up truck and trailer to provide an economical cleaning solution for the railroads and industry.

The power washer is perfect for removing dirt, debris and caked-on product from box cars, grain hoppers and tank cars, and sprays away the grit and grime from locomotives as well.

This flexible device is used in a variety of other applications, including window and wall cleaning, industrial floor washing and the removal of spilled liquid materials from railcars or ground surfaces. It has a broad range of environmental applications such as cleaning chemical storage tanks, and can even be used to de-ice fuel racks or other outdoor equipment.

Powered by a portable compressor, the power washer is a self-contained, trailer-mounted system that can be deployed quickly to bring its mobile cleaning capabilities directly to your location.

Hulcher's power washer is the perfect choice for keeping your trains, equipment and facilities looking their best.
