

TIE DOWN / LOAD OUT SERVICES

Hulcher Services Inc. is trained to load-out and tie-down a variety of materials and heavy equipment, including military vehicles, transportation, industrial and agricultural equipment.

We are Military Safety trained to assist with the unique tie-down requirements of the United States Armed Services. We've assisted numerous military deployments around the country, which included the setup and tear down of ramps to load and unload vehicles.

Hulcher has the capability to coordinate a load-out project from beginning to end. We can move any size material or railcar, plus coordinate transportation to your location of choice. Hulcher Services can load and transport damaged railcars on specially designed semis. We can also move cars from yard to yard or even transport the cars to a repair facility if necessary.

For more information about our services, call our 24/7/365 Customer Service Center at 800-637-5471.
